The SPF project “Assessment; Japan-U.S. Response to Fukushima Crisis”
Publication of the Final Report

October 11, 2012

Tokyo-The Sasakawa Peace Foundation has published the final report of the project “Assessment; Japan-U.S. Response to Fukushima Crisis”, titled “The Fukushima Nuclear Accident and Crisis Management: Lessons for US-Japan Cooperation”. The project was launched last July to review and analyze lessons learned from the Japan-U.S. cooperation and coordination after Fukushima nuclear accident.

The report is available both in English and Japanese, can be downloaded from our Website below. (http://www.spf.org/publication/detail_8271.html)
Should you wish to obtain a hard copy, please contact below as the number of copies is limited.

Led by five specialists on security and nuclear related field, this project aimed at reviewing and analyzing lessons learned from the Japan-U.S. cooperation and coordination after Fukushima nuclear accident. On the basis of these assessments, the project provided policy recommendations for improving the US-Japan crisis management capabilities.

Publishing of this report was made possible by obtaining cooperation of many experts in both Japan and the U.S. On July 30, 2012, we have invited Professor Richard Love of US National Defense University and Ms. Jane Nakano of the Center for Strategy and International Studies (CSIS) to the roll out event of the project to have their comments before finalizing the report.
Table of Contents

Introduction

Chapter 1: The Accident at the Fukushima Daiichi Nuclear Power Plant
1.1 An overview of the accident at the Fukushima Daiichi Nuclear Power Plant
   (1) Earthquake and Tsunami
   (2) Timeline of the accident
   (3) The spent fuel pool and other conditions at the plant, and the exposure of workers to radiation
1.2 The government response and evacuation of residents: offsite conditions
   (1) Government response
   (2) Evacuation of residents/evacuation zone
1.3 The inadequacies of the response to the accident
   (1) Were accident prevention measures sufficient?
   (2) Were accident mitigation efforts sufficient?

Chapter 2: The Societal Impact of the Nuclear Accident
2.1 Response to the contamination problem
   (1) Contamination of food and water
   (2) Government policy on human radiation exposure
   (3) Decontamination efforts
   (4) Impact on industry and others
2.2 Impact on nuclear energy policy
   (1) Impact on power supply stability
   (2) Distrust of past nuclear energy administration and changes in nuclear energy policy
   (3) Impact on nuclear energy policy abroad
2.3 Societal impact and issues in the wake of the disaster
   (1) Social impact of the radioactivity
   (2) Social impact caused by the lack of clear information
   (3) Compensation issue

Chapter 3: Japan-US Cooperation and Crisis Management after the Fukushima Daiichi Nuclear Power Plant Accident
3.1 The Fukushima nuclear accident and Japan-US cooperation
3.2 A chronology of Japan-US cooperation and crisis management
3.3 Military-to-military cooperation
3.4 Differences in American and Japanese approaches to crisis management and the role of the Bilateral Joint Operations Coordination Center
3.5 Overall evaluation of Japan-US cooperation
   (1) Information
   (2) Channels of Dialogue
Chapter 4: Vulnerabilities in Nuclear Security

4.1 The international background of expanding and strengthening nuclear security policy

4.2 International and domestic responses to strengthening nuclear security measures
   (1) International responses
   (2) Domestic responses

4.3 Japan’s response to the nuclear security lessons learned from the Fukushima accident
   (1) Report of the Japanese Government to the IAEA Ministerial Conference on Nuclear Safety
   (2) Deliberations and report of the Advisory Committee on Nuclear Security (Sept. 2011)
   (3) Deliberations and report of the Advisory Committee on Nuclear Security (March 2012)
   (4) Actions taken by regulatory and other bodies in response to the report of the Advisory Committee on Nuclear Security

4.4 Threat perceptions in the United States and Japan prior to and after the Fukushima accident

Chapter 5: Strengthening Japan-US Cooperation in the Nuclear Security Field

5.1 The history of Japan-US cooperation in the nuclear security field

5.2 Strengthening Japan-US cooperation
   (1) Human resource development
   (2) Japan-US joint outreach efforts
   (3) Development of technology for measuring and detecting nuclear material

5.3 Applying the lessons learned from the Fukushima Daiichi Nuclear Power Plant accident in Japan-US cooperation
   (1) Preparation for mitigation
   (2) Insider threat countermeasures
   (3) Research on the synergy between nuclear safety and nuclear security
   (4) Implementation of INFCIRC/225/Revision
   (5) Strengthening nuclear security in the transport sector
   (6) Measures for decommissioning the Fukushima Daiichi Nuclear Power Plant

6.1 Decision-making and crisis-response mechanisms

Lessons
<Recommendations>

6.2 The role of information in effective decision making

<Lessons>

<Recommendations>

6.3 The role of Japan-US joint action frameworks: the barrier of a vertically divided system of Japan-US counterparts

<Lessons>

<Recommendations>

6.4 Efforts by the United States and Japan (the alliance) toward the international community

<Recommendations>

Afterword

Appendix 1: Timeline of the accident at the Fukushima Daiichi Nuclear Plant (Units 1–4)
Appendix 2: What is nuclear power generation?
Appendix 3: What are radioactive contamination and radiation exposure?
Appendix 4: About the project members
