Unraveling Layers of MASCULINITY

—New Roles of Men to Promote Women's Empowerment—

Traditional social norms like these have been (and still are) used to measure masculinity where norms come in different layers –some promote whereas others hinder gender equality.

Sasakawa Peace Foundation (SPF) and Organisation for Economic Co-operation and Development (OECD), on this occasion, convene key players around the world as high-level speakers aim to illuminate and advocate new roles of men to unravel the restrictive norms of masculinity.

“Be the breadwinner”
“Men don't cry”
“Man-up”
“Assert Dominance”
