AFFINITY: KOREA

Q1.Tell us about your affinity toward each of the following countries/regions. [SA] 2.Korea

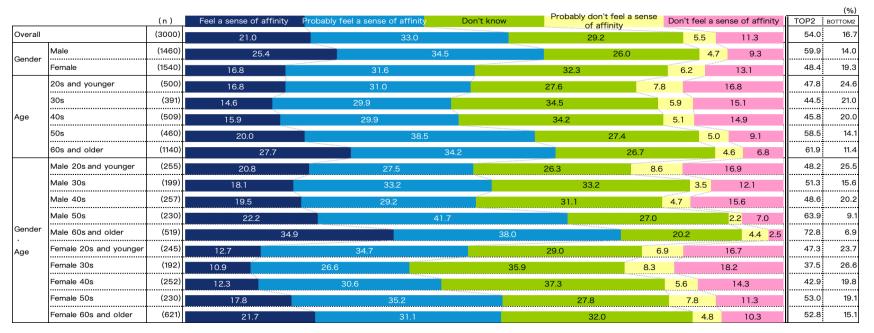

- On an all-respondent basis, the top 2 box score (Feel a sense of affinity + Probably feel a sense of affinity) is 25.6%, while the bottom 2 box score (Don't feel a sense of affinity + Probably don't feel a sense of affinity) is 47.3%.
- By gender, the top 2 box score (Feel a sense of affinity + Probably feel a sense of affinity) is 32.6% for women, higher than for men, while the bottom 2 box score (Don't feel a sense of affinity + Probably don't feel a sense of affinity) is 55.5% for men, higher than for women.
- By age group, the top 2 box score (Feel a sense of affinity + Probably feel a sense of affinity) is 36.2% for those in their 20s or younger, higher than the other age groups, and the younger the respondent, the higher the score.
- By gender and age group, the top 2 box score (Feel a sense of affinity + Probably feel a sense of affinity) is 48.2% for women in their 20s or younger, higher than for the other gender and age groups. In all age groups, women's scores are higher than men's.

AFFINITY: THE U.S.

Q1.Tell us about your affinity toward each of the following countries/regions. [SA] 3. the US

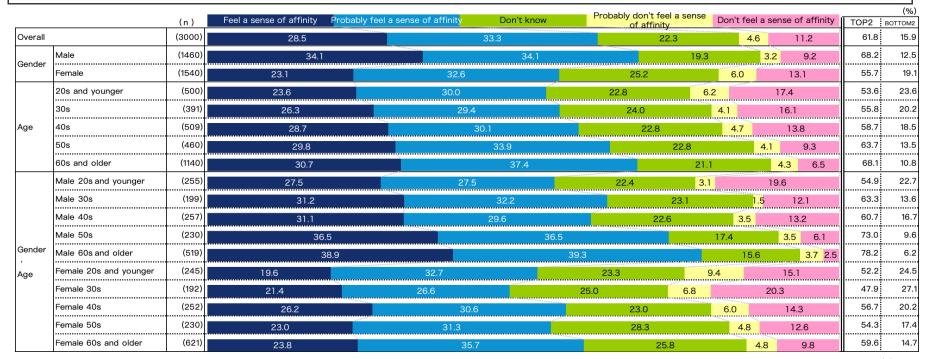

- On an all-respondent basis, the top 2 box score (Feel a sense of affinity + Probably feel a sense of affinity) is 54.0%, while the bottom 2 box score (Don't feel a sense of affinity + Probably don't feel a sense of affinity) is 16.7%.
- By gender, the top 2 box score (Feel a sense of affinity + Probably feel a sense of affinity) is 59.9% for men, higher than for women, while the bottom 2 box score (Don't feel a sense of affinity + Probably don't feel a sense of affinity) is 19.3% for women, higher than for men
- By age group, the top 2 box score (Feel a sense of affinity + Probably feel a sense of affinity) is 61.9% for those in their 60s or older, higher than that of other age groups. The bottom 2 box score (Don't feel a sense of affinity + Probably don't feel a sense of affinity) is 24.6% for those in their 20s or younger, higher than those of other age groups, indicating that the younger the respondent, the higher the score.
- By gender and age group, the top 2 box score (Feel a sense of affinity + Probably feel a sense of affinity) is higher for men in their 60s or older at 72.8% and for men in their 50s at 63.9%, higher than for the other gender and age groups. In all age groups, men's scores are higher than women's.

AFFINITY: TAIWAN

Q1.Tell us about your affinity toward each of the following countries/regions. [SA] 4.Taiwan

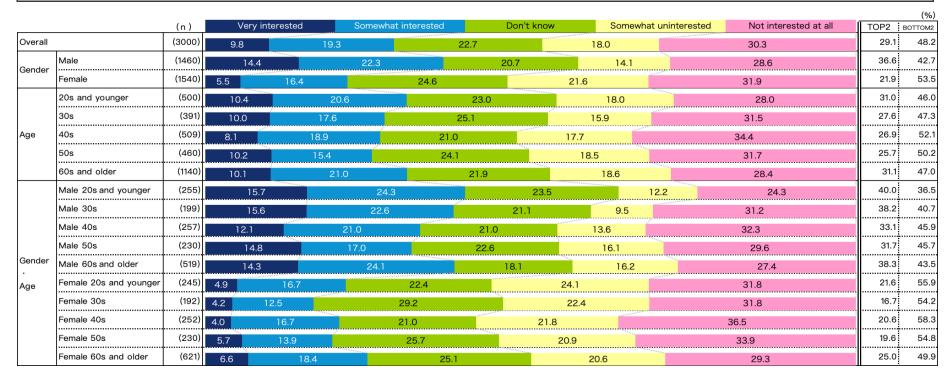

- On an all-respondent basis, the top 2 box score (Feel a sense of affinity + Probably feel a sense of affinity) is 61.8%, while the bottom 2 box score (Don't feel a sense of affinity + Probably don't feel a sense of affinity) is 15.9%.
- By gender, the top 2 box score (Feel a sense of affinity + Probably feel a sense of affinity) is 68.2% for men, higher than for women, while the bottom 2 box score (Don't feel a sense of affinity + Probably don't feel a sense of affinity) is 19.1% for women, higher than for men.
- By age group, the top 2 box score (Feel a sense of affinity + Probably feel a sense of affinity) is 68.1% for those in their 60s or older, higher than
 the other age groups, and the older the respondent, the higher the score. By age group, the bottom 2 box score (Don't feel a sense of affinity +
 Probably don't feel a sense of affinity) is 23.6% for those in their 20s or younger, higher than the other age groups, and the younger the
 respondent, the higher the score.
- By gender and age group, the top 2 box score (Feel a sense of affinity + Probably feel a sense of affinity) is higher for men in their 60s or older at 78.2% and for men in their 50s at 73.0%, higher than for the other gender and age groups. In all age groups, men's scores are higher than women's.

INTEREST: CHINA

Q2.Tell us about your interest in each of the following countries/regions. [SA] 1.China

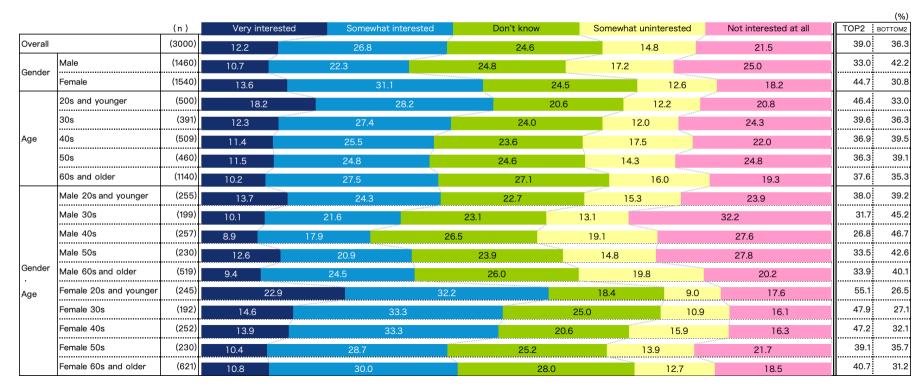

- On an all-respondent basis, the top 2 box score (Very interested + Somewhat interested) is 29.1%, while the bottom 2 box score (Not interested at all + Somewhat uninterested) is 48.2%.
- By gender, the top 2 box score (Very interested + Somewhat interested) is 36.6% for men, higher than for women, while the bottom 2 box score (Not interested at all + Somewhat uninterested) is 53.5% for women, higher than for men.
- By gender and age group, the top 2 box score (Very interested + Somewhat interested) is 40.0% for men in their 20s or younger, higher than for the other gender and age groups. In all age groups, men's scores are higher than women's. The bottom 2 box score (Not interested at all + Somewhat uninterested) is higher for women in their 40s (58.3%), the highest of all genders and age groups. In all age groups, women's scores are higher than men's.

INTEREST: KOREA

Q2.Tell us about your interest in each of the following countries/regions. [SA] 2.Korea

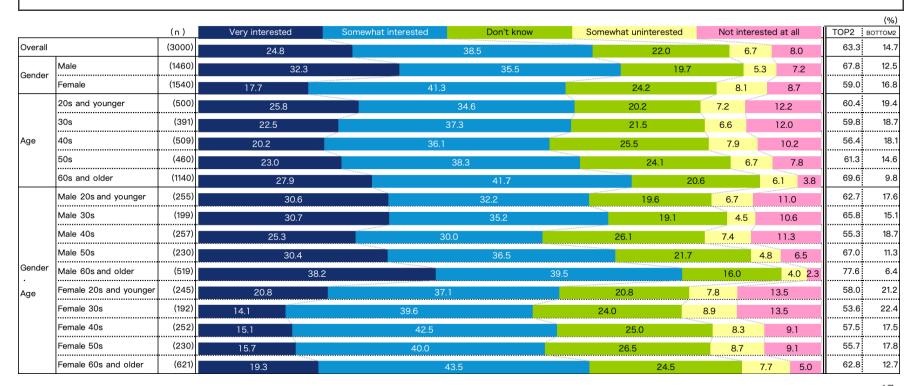

- On an all-respondent basis, the top 2 box score (Very interested + Somewhat interested) is 39.0%, while the bottom 2 box score (Not interested at all + Somewhat uninterested) is 36.3%.
- By gender, the top 2 box score (Very interested + Somewhat interested) is 44.7% for women, higher than men, while the bottom 2 box score (Not interested at all + Somewhat uninterested) is 42.2% for men, higher than for women.
- By gender and age group, the top 2 box score (Very interested +Somewhat interested) is 55.1% for women in their 20s or younger, higher than for the other gender and age groups. The bottom 2 box score (Not interested at all +Somewhat uninterested) is higher for men in their 40s (46.7%) and 30s (45.2%), higher than for the other gender and age groups.

INTEREST: THE U.S.

Q2.Tell us about your interest in each of the following countries/regions. [SA] 3.the US

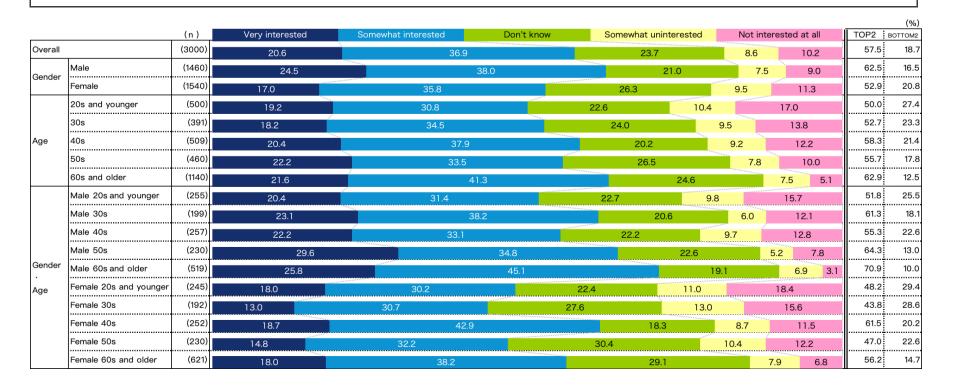

- On an all-respondent basis, the top 2 box score (Very interested + Somewhat interested) is 63.3%, while the bottom 2 box score (Not interested at all + Somewhat uninterested) is 14.7%.
- By gender, the top 2 box score (Very interested + Somewhat interested) is 67.8% for men, higher than for women.
- By age group, the bottom 2 box score (Not interested at all + Somewhat uninterested) is 19.4% for those in their 20s or younger, higher than the other age groups, and the younger the respondent, the higher the score.
- By gender and age group, the top 2 box score (Very interested + Somewhat interested) is 77.6% for men in their 60s or older, higher than for the other gender and age groups. The bottom 2 box score (Not interested at all + Somewhat uninterested) is higher for women in their 30s (22.4%) and 20s or younger (21.2%), higher than other gender and age groups.

INTEREST: TAIWAN

Q2.Tell us about your interest in each of the following countries/regions. [SA] 4.Taiwan

- On an all-respondent basis, the top 2 box score (Very interested + Somewhat interested) is 57.5%, while the bottom 2 box score (Not interested at all + Somewhat uninterested) is 18.7%.
- By gender, the top 2 box score (Very interested + Somewhat interested) is 62.5% for men, higher than for women.
- By age group, the bottom 2 box score (Not interested at all + Somewhat uninterested) is 27.4% for those in their 20s or younger, higher than the other age groups, and the younger the respondent, the higher the score.
- By gender and age group, the top 2 box score (Very interested +Somewhat interested) is 70.9% for men in their 60s or older, higher than for the other gender and age groups. The bottom 2 box score (Not interested at all +Somewhat uninterested) is higher for women in their 20s or younger (29.4%) and 30s (28.6%), higher than for the other gender and age groups.

INFORMATION ACQUISITION LANGUAGE: CHINA

Q3.Which language do you use to obtain information on the following countries/regions? Choose all that apply. [MA] 1.China

- On an all-respondent basis, the score for "Japanese" is the highest at 57.6%, followed by "Not trying to obtain information" (36.0%) and "Chinese" (6.4%).
- By gender, the score for "Japanese" is higher for men (62.6%) than for women, while that of "Not trying to obtain information" is higher for women (41.0%) than for men.
- By age group, the score for "Japanese" is higher for those in their 60s or older at 64.5% than for other age groups, and the older the respondent, the higher the score. The score for "Chinese" is higher for those in their 20s or younger at 12.4% than for other age groups, and the younger the respondent, the higher the score.
- By gender and age group, the scores for "Japanese" are 71.1% for men in their 60s or older and 66.5% for men in their 50s, higher than for the other gender and age groups. The score for "Chinese" is 12.9% for men in their 20s or younger and 11.8% for women in their 20s or younger, higher than for the other gender and age groups.

Q8. How have China and the Japan-China relations changed compared with ten years ago? For each of the following descriptions, choose one closest to your opinion. [SA] 4. The difference in national power between Japan and China has grown over the last decade

- On an all-respondent basis, the top 2 box score (Strongly agree + Somewhat agree) is 49.8%, while the bottom 2 box score (Strongly disagree + Somewhat disagree) is 9.3%.
- By gender, the top 2 box score (Strongly agree + Somewhat agree) is higher for men (58.6%) than for women.
- By age group, the top 2 box score (Strongly agree +Somewhat agree) is 63.8% for those in their 60s or older, higher than the other age groups, and the older the respondent, the higher the score. The bottom 2 box score (Strongly disagree +Somewhat disagree) is 14.4% for those in their 20s or younger, higher than the other age groups, and the younger the respondent, the higher the score.
- By gender and age group, the top 2 box score (Strongly agree + Somewhat agree) is 74.6% for men in their 60s or older, higher than the other gender and age groups. In all age groups, men's scores are higher than women's.

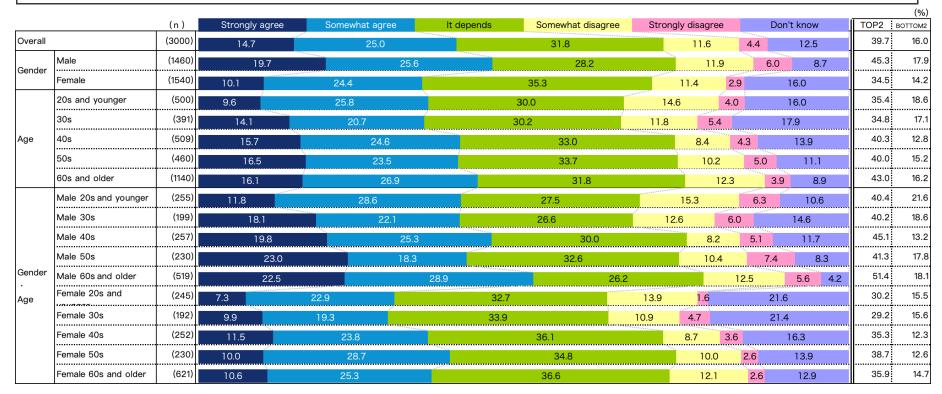

Q8. How have China and the Japan-China relations changed compared with ten years ago? For each of the following descriptions, choose one closest to your opinion. [SA] 5. China's attitude towards international society is more arrogant compared with ten years ago

- On an all-respondent basis, the top 2 box score (Strongly agree + Somewhat agree) is 55.0%, while the bottom 2 box score (Strongly disagree + Somewhat disagree) is 7.2%.
- By gender, the top 2 box score (Strongly agree + Somewhat agree) is higher for men (61.2%) than for women.
- By age group, the top 2 box score (Strongly agree +Somewhat agree) is 72.7% for those in their 60s or older, higher than the other age groups, and the older the respondent, the higher the score. The bottom 2 box score (Strongly disagree +Somewhat disagree) is higher for those in their 20s or younger (13.4%) than for the other age groups.
- By gender and age group, the top 2 box score (Strongly agree +Somewhat agree) is 80.0% for men in their 60s or older, higher than the other gender and age groups. The bottom 2 box score (Strongly disagree +Somewhat disagree) is higher for men in their 20s or younger (16.5%) than for the other gender and age groups.

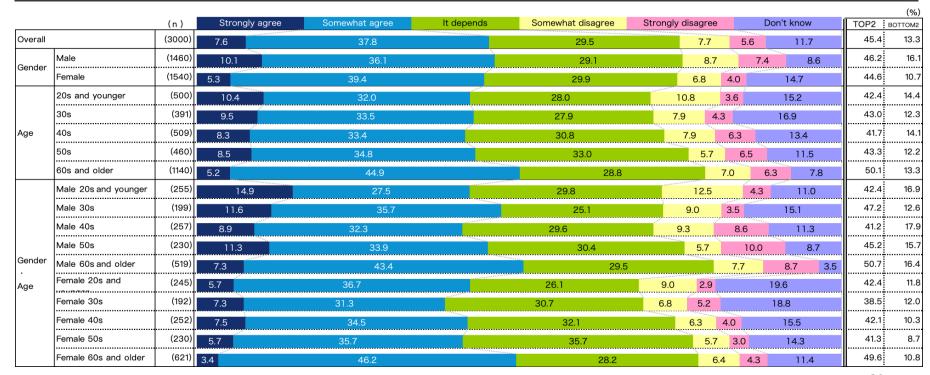

Q9. What do you think Japan should do when interacting with China? For each of the following descriptions, choose the one closest to your opinion. [SA] 1. Japan should keep the interaction with China to a minimum in consideration of various risks

- On an all-respondent basis, the top 2 box score (Strongly agree + Somewhat agree) is 39.7%, while the bottom 2 box score (Strongly disagree + Somewhat disagree) is 16.0%.
- By gender, the top 2 box score (Strongly agree + Somewhat agree) is higher for men (45.3%) than for women.
- By age group, the top 2 box score (Strongly agree + Somewhat agree) is 43.0% for those in their 60s or older, higher than the other age groups.
- By gender and age group, the top 2 box score (Strongly agree +Somewhat agree) is 51.4% for men in their 60s or older, higher than the other gender and age groups. The bottom 2 box score (Strongly disagree +Somewhat disagree) is higher for men in their 20s or younger (21.6%) than for the other gender and age groups.

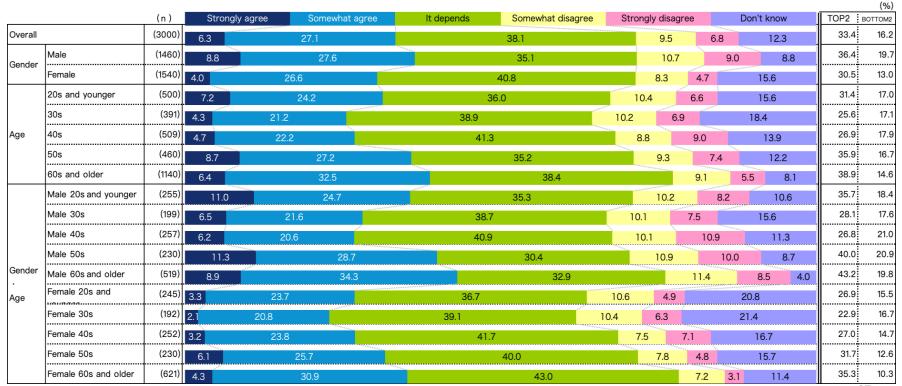

Q9. What do you think Japan should do when interacting with China? For each of the following descriptions, choose the one closest to your opinion. [SA] 2. Japan needs to interact with China in order to maintain and develop the Japanese economy

- On an all-respondent basis, the top 2 box score (Strongly agree + Somewhat agree) is 45.4%, while the bottom 2 box score (Strongly disagree + Somewhat disagree) is 13.3%.
- By gender, the bottom 2 box score (Strongly disagree + Somewhat disagree) is higher for men (16.1%) than for women.
- By age group, the top 2 box score (Strongly agree + Somewhat agree) is 50.1% for those in their 60s or older, higher than the other age groups.
- By gender and age group, the top 2 box score (Strongly agree + Somewhat agree) is 50.7% for men in their 60s or older and 49.6% for women in their 60s or older, higher than the other gender and age groups.

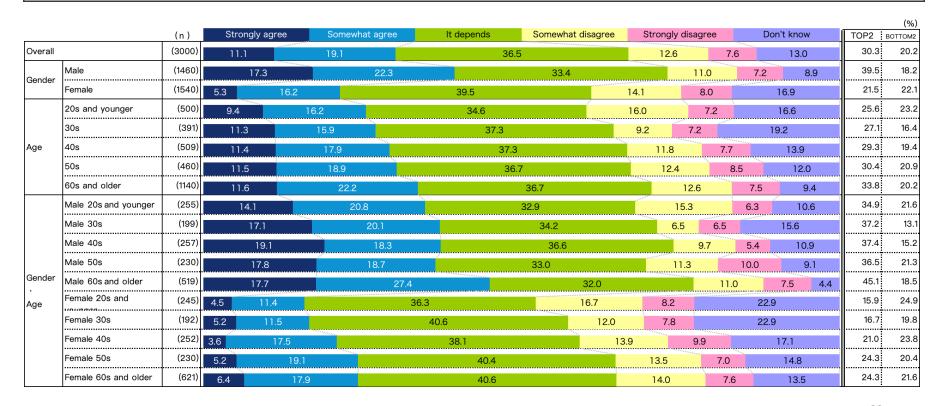

Q9. What do you think Japan should do when interacting with China? For each of the following descriptions, choose the one closest to your opinion. [SA] 3. The Japanese government needs to build a closer tie with the Chinese government to maintain peace

- On an all-respondent basis, the top 2 box score (Strongly agree + Somewhat agree) is 33.4%, while the bottom 2 box score (Strongly disagree + Somewhat disagree) is 16.2%.
- By gender, the bottom 2 box score (Strongly disagree + Somewhat disagree) is higher for men (19.7%) than for women.
- By age group, the top 2 box score (Strongly agree + Somewhat agree) is 38.9% for those in their 60s or older, higher than the other age groups.
- By gender and age group, the top 2 box score (Strongly agree + Somewhat agree) is 43.2% for men in their 60s or older, higher than the other gender and age groups.

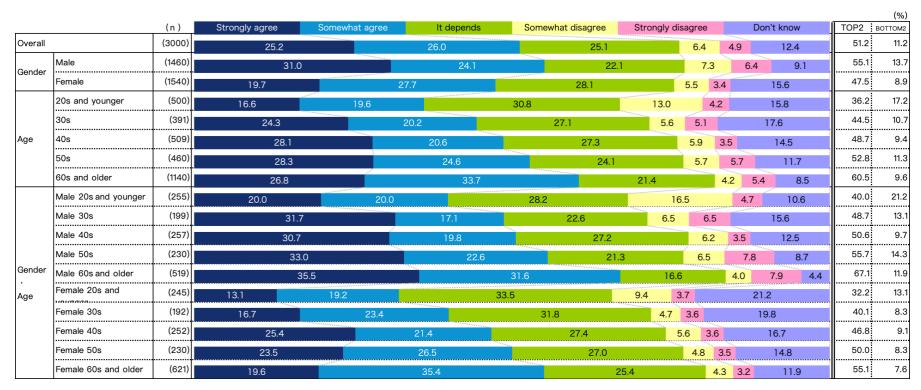

Q9. What do you think Japan should do when interacting with China? For each of the following descriptions, choose the one closest to your opinion. [SA] 4. Japan should take countermeasures against China's military expansion

- On an all-respondent basis, the top 2 box score (Strongly agree + Somewhat agree) is 30.3%, while the bottom 2 box score (Strongly disagree + Somewhat disagree) is 20.2%.
- By gender, the top 2 box score (Strongly agree + Somewhat agree) is higher for men (39.5%) than for women.
- By age group, the top 2 box score (Strongly agree + Somewhat agree) is 33.8% for those in their 60s or older, higher than the other age groups, and the older the respondent, the higher the score.
- By gender and age group, the top 2 box score (Strongly agree + Somewhat agree) is 45.1% for men in their 60s or older, higher than the other gender and age groups. In all age groups, men's scores are higher than women's.

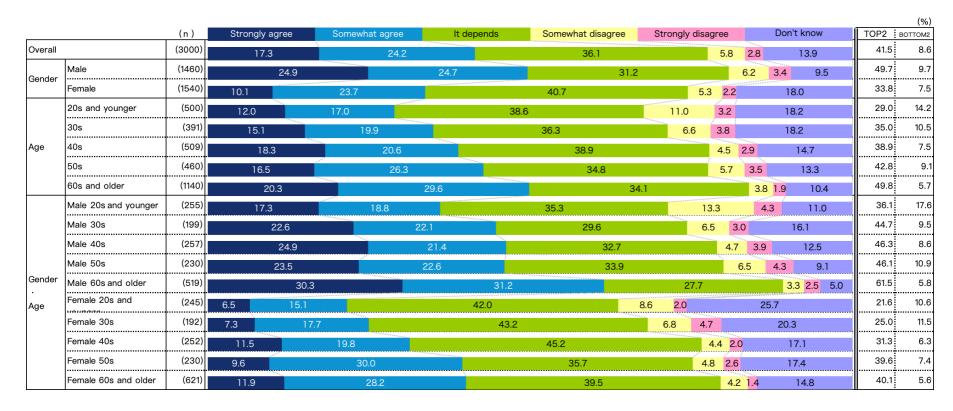

Q9. What do you think Japan should do when interacting with China? For each of the following descriptions, choose the one closest to your opinion. [SA] 5. Japan doesn't need to limit exchange with Taiwan in consideration of China's stance

- On an all-respondent basis, the top 2 box score (Strongly agree + Somewhat agree) is 51.2%, while the bottom 2 box score (Strongly disagree + Somewhat disagree) is 11.2%.
- By gender, the top 2 box score (Strongly agree + Somewhat agree) is higher for men (55.1%) than for women.
- By age group, the top 2 box score (Strongly agree + Somewhat agree) is 60.5% for those in their 60s or older, higher than the other age groups, and the older the respondent, the higher the score.
- By gender and age group, the top 2 box score (Strongly agree + Somewhat agree) is 67.1% for men in their 60s or older, higher than the other gender and age groups, and the older the respondent, the higher the score for both men and women. In all age groups, men's scores are higher than women's. The bottom 2 box score (Strongly disagree + Somewhat disagree) is higher for men in their 20s or younger (21.2%) than for the other gender and age groups.

Q9. What do you think Japan should do when interacting with China? For each of the following descriptions, choose the one closest to your opinion. [SA] 6. Japan should be on the side of the US amid the current US-China conflict

- On an all-respondent basis, the top 2 box score (Strongly agree + Somewhat agree) is 41.5%, while the bottom 2 box score (Strongly disagree + Somewhat disagree) is 8.6%.
- By gender, the top 2 box score (Strongly agree + Somewhat agree) is higher for men (49.7%) than for women.
- By age group, the top 2 box score (Strongly agree + Somewhat agree) is 49.8% for those in their 60s or older, higher than the other age groups, and the older the respondent, the higher the score.
- By gender and age group, the top 2 box score (Strongly agree + Somewhat agree) is 61.5% for men in their 60s or older, higher than the other
 gender and age groups, and the older the respondent, the higher the score for both men and women. In all age groups, men's scores are higher
 than women's. The bottom 2 box score (Strongly disagree + Somewhat disagree) is higher for men in their 20s or younger (17.6%) than for the
 other gender and age groups.

EFFECTIVE INITIATIVES FOR PROGRESS IN JAPAN-CHINA RELATIONS

Q10.What initiatives would be effective in advancing Japan-China relations? Choose up to three that are close to your opinion. [MA]

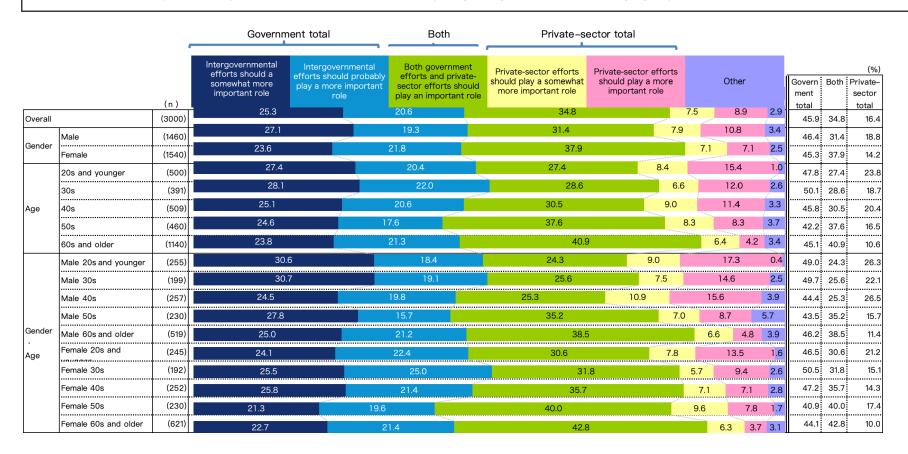

- On an all-respondent basis, the score for "Strengthening the political and security ties between Japan and China" is the highest at 33.1%, followed by "Promoting exchanges in various fields including culture and art" (28.9%), and "Strengthening the economic tie between Japan and China" (28.7%).
- By gender, the score for "Regular mutual visits between the heads of both countries" is higher for men (31.2%) than for women.
- By age group, the scores for "Strengthening the political and security ties between Japan and China" (36.9%), "Promoting exchanges in various fields including culture and art" (34.5%), and "Regular mutual visits between the heads of both countries" (32.8%) are higher for those in their 60s or older than for the other age groups. The score for "Don't know" is higher for those in their 20s or younger at 37.4% than for other age groups, and the younger the respondent, the higher the score.
- By gender and age group, the scores for "Regular mutual visits between the heads of both countries" (39.3%), "Promoting exchanges in various fields including culture and art" (36.0%), and "Settling mutual differences in historical perceptions" (33.7%) are higher for men in their 60s or older than for the other gender and age groups. The score for "Don't know" is higher for women in their 20s or younger at 44.1% than for the other gender and age groups.

ORGANIZATIONS WORKING ON JAPAN-CHINA RELATIONS

Q11. Various activities are taking place between Japan and China, from high-level government dialogues to private grassroots activities. Which do you think should play a more important role to make the Japan-China relationship healthier going forward: government efforts or private-sector efforts? [SA]

- On an all-respondent basis, the combined score for intergovernmental efforts (Intergovernmental efforts should play a somewhat more important role + Intergovernmental efforts should probably play a more important role) is 45.9%.
- The score for "Both government efforts and private-sector efforts should play an important role" is 34.8%.
- By age group, the score for "Both government efforts and private-sector efforts should play an important role" is 40.9% for those in their 60s or older, higher than the other age groups, and the older the respondent, the higher the score.
- The combined score for private-sector efforts (Private-sector efforts should play a more important role + Private-sector efforts should play a somewhat more important role) is 23.8% for those in their 20s or younger, higher than the other age groups.

REASONS FOR SELECTING "GOVERNMENT" AS THE MAIN ORGANIZATION TO ADDRESS JAPAN-CHINA RELATIONS

Q12.Let us ask those who chose "1. Intergovernmental efforts should play a more important role" or "2. Intergovernmental efforts should play a somewhat more important role" in Q11. Choose up to three that are close to your reasons. [MA]

- On an all-respondent basis, the score for "Because intergovernmental efforts work more effectively since private-sector activities are bound by a range of laws and regulations of both countries" is the highest at 36.2%, followed by "Because intergovernmental efforts are given greater budgets than private-sector efforts and are expected to have a social impact" (32.2%) and "Because intergovernmental efforts can help avoid risks since they pay enough attention to the safety of both countries' people" (29.9%).
- By gender, the score for "Don't know" is higher for women (24.2%) than for men.
- By gender and age, the scores for "Because intergovernmental efforts can create a new framework that allows the private sector to participate" (35.2%) among men in their 20s and younger, "Because intergovernmental efforts work more effectively since private-sector activities are bound by a range of laws and regulations of both countries" (44.2%), "Because intergovernmental efforts can help avoid risks since they pay enough attention to the safety of both countries" people" (36.3%), and "Because intergovernmental efforts can select appropriate responses by recognizing mutual circumstances and policies through high-level dialogue" (32.9%) among men in their 60s or older, and "Because intergovernmental efforts work more effectively since private-sector activities are bound by a range of laws and regulations of both countries" (42.0%) among women in their 60s or older are higher than the other gender and age groups.

REASONS FOR SELECTING "PRIVATE" AS THE MAIN ORGANIZATION TO ADDRESS JAPAN-CHINA RELATIONS

Q13.Let us ask those who chose "4. Private-sector efforts should play a somewhat more important role" or "5. Private-sector efforts should play a more important role" in Q11. Choose up to three that are close to your reasons. [MA]

- On an all-respondent basis, the score for "Don't know" is the highest at 40.8%, followed by "Because private-sector efforts, in which anyone can participate, can easily permeate society, while those who can participate in intergovernmental efforts are limited" (23.9%) and "Because private-sector exchanges can encourage free thinking and resolve issues that may be found difficult to deal with and shelved in intergovernmental negotiations" (21.3%).
- By gender, the score for "Don't know" is higher for women (46.1%) than for men.
- By gender and age, the scores are higher among men in their 60s or older than among the other gender and age groups for "Because private-sector efforts, in which anyone can participate, can easily permeate society, while those who can participate in intergovernmental efforts are limited" (45.8%) and "Because private-sector exchanges can take time to build trust and communicate their honest opinions, while intergovernmental negotiations are so formal that they may lead to misunderstanding" (32.2%). Meanwhile, among women in their 60s or older, the score for "Because it is more likely for private-sector negotiations to result in an agreement even on issues where governments may have difficulty finding a compromise" (38.7%) is higher than among the other gender and age groups. The scores for "Don't know" are higher for women in their 20s or younger at 65.4% and for men in their 30s at 63.6% than for the other gender and age groups.
