

The Future of World Order and Nuclear Weapons, Thinking from Hiroshima
Where We Are Today in Deterrence, Strategy, Disarmament, Arms Control, and Humanitarian Impact

The war in Ukraine has raised a grave concern about escalation of competition among great powers and the possible invoking of changes to the status quo in the region. In this international symposium, we will discuss what changes the nuclear deterrence, nuclear strategy, nuclear disarmament and arms control that we know of are beginning to show, in this environment, in terms of nature and assumptions in international politics. We also talk about how nuclear issues should be viewed as part of the global agenda amid the transformation and multipolarization of international order.
